

## BLM CONSULT

At BLM we recognise that our markets, and that of our clients, are changing significantly. Any response to change needs to be equally as dynamic. Our BLM Consult team has been created from a combination of lawyers, change consultants and Lean practitioners, from a wide range of industry sectors, who can work collaboratively with you to help you on your own change journeys.

### We can help by:

- Helping you identify the root cause of problems and suggest improvement measures to your processes to increase efficiencies.
- Upskilling your own teams, by providing training in Lean change techniques.
- Supporting your managers and operators with the change transition and realise the benefit of their change in process.

### Your BLM Consult options

#### **Solution Identification & Delivery**

This type of engagement addresses a related group of process issues requiring structured and in-depth analysis and engagement. These projects are usually anything up to eight weeks in duration, dependent on scope and complexity.

#### **Collective Problem Solving Workshop**

A rapid change "Kaizen" event where a specific problem area is selected and a collaborative, cross business working party identify and implement solutions to deliver

collective change. The session is typically delivered across one to two days.

#### **Lean Process Improvement Training**

Delivery of Lean training, covering basic principles through to full Lean DMAIC change cycle. Fully tailored around the needs of your teams and business, this ranges from a one day course to a full week of training.

#### **Management & Business Coaching**

Coaching & mentoring to those in management positions and help them better manage their team or department through the experiences we have as a team.

**BLM CONSULT**

### **Why BLM?**

We have a multi-skilled team with a variety of industry experiences including, legal, consulting, operations, insurance, banking, manufacturing & sales. We continually invest in our team ensuring we stay up to date with essential skills and qualifications such as Lean Green and Black Belts, as well as MBA-qualifications and best practice management of operations. Our collaboration with our clients, as well as our analytics, IT and legal colleagues ensures we identify the best solution to meet your needs.

All of our services are supported by a team with expertise and knowledge of combined management, coaching and mentoring expertise. This includes Lean Black and Green Belts, ex-consulting environments, operational leadership roles and legal.

Whether you are starting or continuing your change journey, please get in touch for a conversation.
