

BLM Action Protecting Our People

COVID-19

Corporate Risk Assessment

BLM Action Protecting Our People

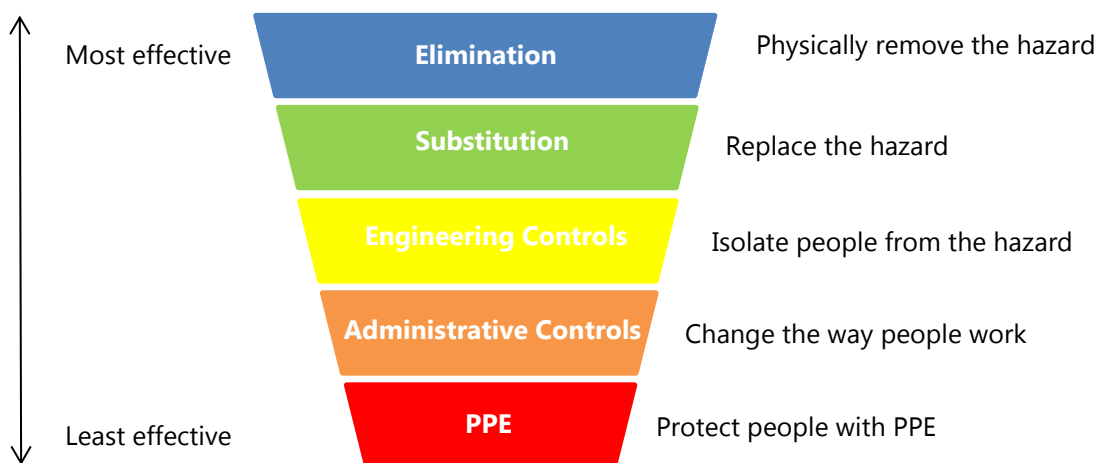

Introduction

This document is designed to set out and communicate the significant risks that relate to COVID-19 within the office environment. BLM has a legal responsibility to protect workers and others from risk to their health and safety. By conducting this risk assessment BLM can demonstrate that it has taken the necessary steps to control the risks as low as reasonably practicable. BLM will use the following points to develop a site specific risk assessment and implement appropriate control measures.

1. We have carried out a COVID-19 risk assessment and shared the results with the people who work here
2. We have cleaning, handwashing and hygiene procedures in line with guidance
3. We have taken all reasonable steps to help people work from home
4. We have taken all reasonable steps to maintain and adhere to various Government guidance regarding social distancing in the workplace
5. Where people cannot social distance we have done everything practical to manage the transmission risk

The guidance sets out the "Five Steps to Safer Working Together" listed above which BLM have a legal duty to undertake and confirm have been complied with by displaying appropriate Government approved signage.

The risk assessment will be developed using all elements of the hierarchy of control model.

The risk assessment will identify significant risks, including control measures already taken and further actions to be taken to control the risk. The risk assessment will then be tailored for each individual BLM office.

Additional comments

Wellbeing

HR, Line Managers, Team Leaders, Partners & EP's will all take an active role in monitoring the wellbeing of their staff and help them stay connected to the rest of the workforce.

BLM will ensure those workers who need to self isolate are able to work from home if appropriate.

A central point of communication will be implemented paul.barnacle@blmlaw.com (Head of Health & Safety) allowing staff to raise any H&S concerns.

BLM will put in place effective communications and training regarding the new work place practices prior to workers returning to work.

Internal / External Meetings

Only in extreme circumstances when a face to face meeting is absolutely necessary approval to be obtained prior and the following to be implemented – limited people attend the meeting, good ventilation made available (all windows opened if able) 2m rule implemented. And checks made to see if those people requiring to attend the meeting don't have any symptoms or people they share a household do either. Hand sanitiser stations made available, no stationary or catering will be supplied.
