

BLM Innovations
Realtime

The **smarter tool** for staying up to date.

Do your file handlers want quick and easy access to cases and documents relating to them, or perhaps your audit team wants to be able to audit files remotely?

Do you want to easily interact with the BLM team through the portal, with fast access to Key Performance Indicators about matters with us?

Things can change all the time as a legal case progresses, but Realtime makes it easy to stay on top of developments. It's an online portal offering live access to case data, financial information and legal documents. Clients feel more connected as they can see any relevant data on-demand and send messages to the claims handler. Meanwhile, everyone on the case team can access the latest version of any document.

Realtime is just one of the smart tools available from BLM Innovations which delivers a number of key benefits to those clients who run cases through our bespoke case management system, by:

- Providing an up-to-date, clear and concise view of case progress at the touch of a button
- Delivering reporting to help better decisions about fault, earlier in the life of the claim
- Enabling users to check progress by accessing cases online and send notes to the claims handling lawyer
- Providing transparency throughout case management.

Key features

- Live access to individual case data, financial information and documents
- A client “window” into case management providing key information about their work in an instant.

Smart new tools from experienced legal minds.

Now we can offer you the best of both worlds. The experience of an established law firm, and the smart solutions of BLM Innovations – our exclusive cutting-edge case management, communication and analytics tools.
